

PRESENTATION OF YACHT MANAGEMENT IN VENICE:

In these days, economical situations don't create a friendly ambient for catamaran owners. The increasing demand for mooring in marinas which also raises the marina wages and the beam of catamarans which doubles the mooring wages rather than monohulls.

In order to create an affordable situation for catamaran owners, we are proudly presenting our catamaran yacht management infrastructure which opens a reasonable administrative and technical path to profit all parties. This fruitful management consists of following departments:

1: CATAMARAN MOORING AND RENTAL ORGANISATION IN VENICE:

Venice is a historic city which is attracting millions of tourists 365 days of every year. In order to compensate all expenses of the catamaran, we are proposing yacht rental which affords every expense of the catamaran. The remained sum to be transferred to the owners account. In order to start all this operations, first job would be getting a marine condition survey report done. So that, as is condition of the catamaran for rental acceptance and suggestions for remedial actions will be determined based on this survey report. As the administrative side of the organisation, the flag of the catamaran to be change to Italian flag. And also a new italian company to be established for the owner so that his yacht will be registered on this company with italian flag to commit rental activities legally. New company will give occasions to boat owner to expand his visa and business in European countries. Also, after five years of time he will have the right to apply for residency.

2: RENTAL ACTIVITY TYPES:

Rental activities are consisting of five types. a. daily tours. b. weekend tour c. short week tour. d. long week tour. Long week tours will give an opportunity to discover Croatian coasts that is closer to Venice. e. events and celebrations. Thanks to highly known fame of Venice city, there are always high demands which never slow down all year long. Owners profit depends on type of rental program, catamaran size and building year. According to these points our company is ready to satisfy the profit expectations of owners.

3: TECHNICAL SUPPORT:

All catamarans in our management system will be all time under our technical control. We will take care to keep catamaran in seaworthy, safe and sound condition to be operated for rental activities.

All repairs will be reported in files at the documentation history of the catamaran.

Our company and yacht management organisation is firmly based on being "solution partner" of the catamaran owner. During being under our custody your catamaran will be ours and will be treated in best conditions.
